

Dylan Fino

Senior / Staff UX Researcher

drfino08@gmail.com

267.374.6682

End-to-end **mixed-methods** researcher with deep experience embedding with product teams to drive roadmap decisions, de-risk launches, and translate customer insight into measurable business impact. Customer-obsessed and data-driven.

Experience

Amazon, Senior UX Researcher (Buy with Prime, Ecommerce, AI)

Jan 2022 - Present

- **Led foundational research embedded with Prime/Fulfillment product teams**, informing annual planning and multi-year platform strategy and driving a pivot away from shipping-speed investments toward higher-impact merchant and shopper experiences.
- **Owned end-to-end research uncovering critical onboarding failures in the Buy with Prime Shopify app**, directly driving a \$1M+ investment and launch of “fuzzy” SKU matching that reduced onboarding time by 35% and increased unit-weighted SKU parity by 2,500 bps.
- **Designed and built an AI-powered qualitative synthesis system** that transformed interview transcripts into an always-on VOC, reducing synthesis time by days and enabling product, design, and research partners to directly interrogate customer insight.
- **Led cross-org research integration for a supply chain unification initiative**, aligning insights across 8+ product teams into shared CX frameworks used for roadmap and dependency decisions.
- **Established recurring customer empathy mechanisms** (executive listening sessions, interview livestreams, friction tracking) that tied real customer evidence directly to leadership decision-making and product follow-through.

Comcast, UX Researcher (Xfinity Platform, Home Ecosystem)

Jun 2019 - Jan 2022

- **Led end-to-end research across the Xfinity ecosystem** (web, TV, mobile, and service experiences), supporting complex, cross-platform customer journeys at scale.
- **Owned research strategy for high-impact acquisition and onboarding funnels**, influencing product and design decisions across multiple teams through mixed-methods insight.

Samsung, UX Researcher (Mobile, Emerging Platforms, AI)

Jun 2017 - Jun 2019

- **Led Western market voice-of-customer integration across flagship and emerging products** (Galaxy S/Note, foldables, AI assistants, smart devices), informing portfolio-level product strategy.
- **Drove discovery and concept validation for unreleased products**, partnering with design and engineering to de-risk early-stage bets prior to market commitment.

Education

- Master of Applied Cognition and Neuroscience, Human Computer Interaction, *U. of Texas Dallas*
- Bachelor of Psychology / Neuroscience, *Pennsylvania State University*

Publications: "Developing Virtual Patients with VR/AR for a natural user interface in medical teaching," 2017 *IEEE 5th International Conference on Serious Games and Applications for Health* (SeGAH), 2017

Research Focus: End-to-end UX research across discovery, validation, and post-launch learning, with a strong mixed-methods foundation and a focus on decision-ready insight.

Methods: Generative interviews, surveys, statistical analysis, usability testing, MaxDiff, experimentation, data triangulation, large-scale qualitative synthesis, among others.

Tools: Qualtrics, UserTesting, Figma, Python-based analysis, GenAI-assisted synthesis workflows, among others.
